Microcomputer Graphic Memory limitation problem solved!

Micro - Interpreter I

Perhaps the most valuable microcomputer educational software of the year.
For teachers, interpreters or anyone interested in American Sign Language (ASL).

Micro-Interpreter I (The Fingerspeller) Features:

- * Instant fingerspelling of English letters or words in American Sign Language (ASL).
- * Fingerspelling with or without English caption.
- * Learning comprehension with immediate scoring (for teaching purposes).
- * Speed control (initially about 4 hand signs flashed every second).
- * Available for Apple II+, Apple II+, Apple IIe+, Apple IIc-(48K), and soon for IBM PC+.

Captioned

Micro-Interpreter I contains a 5 1/4" floppy diskette and a 28 page easy-to-understand illustrated manual. No knowledge of sign language or programming required.

Micro-Interpreter I was developed by Dr. A. Tolu Honary at the University of Northern Iowa.

To order send Check, Money Order, or P.O. (Schools & Institutions) to:

Microtech Consulting Company
206 Angie Drive/P.O. Box 521
Cedar Falls, Iowa 50613

Please send me:

- _____ Package(s) of **Micro-Interpreter I** at \$49.95 each. Back-ups are \$6.00 each; limit 4 (schools), 2 (others).
- _____ Your 3 page detailed information on **Micro-Interpreter I**.
- _____ List of publications where **Micro-Interpreter I** has been reviewed.
- _____ Information on **Micro-Interpreter II** (to be released later) containing animated vocabulary of ASL.

U. S. and Canada add \$2.00 (Other countries \$8.00) for postage.

INVEST IN INDEPENDENCE!

Michelle Smithdas, deaf-blind, teaches braille to a young deaf-blind woman at the Helen Keller National Center, using tactual sign language to communicate.

Deaf-blind individuals want and need to be recognized for who they are and what they can do. They want the same opportunities in life as you do.

You can learn to communicate with deaf-blind persons, find out how a work place can accommodate a deaf-blind employee, and become a friend and good neighbor.

Deaf-blind people invite you to invest in their potential — to help them gain independence as tax-paying workers and citizens. To find out what you can do, contact any one of these organizations:
