# When therapist and patient speak the same language,

## a real dialogue begins.

If you've ever treated a hearing impaired patient, you know how difficult it can be to communicate.

Which is why you should know about the Horizon Hospital Hearing Impaired Program — a private hospital program that is so unique, there are only five of its kind in the entire country.

Our therapists are versed in all types of sign language and we offer a wide range of mental health services and therapies, including outpatient treatment.

So, if you need assistance in reaching a hearing impaired patient, reach Horizon Hospital at:

(813) 541-2646

(813) 545-4547 TTY/TDD
